**Reflective Practice Models – University College Dublin**

Schön (1991) identified two types that are particularly relevant in the development of teaching practice: In both instances, you will build on previous learning, linking it to current and future practice. In other words, you will take a step back from your teaching, evaluate it, and extract meaning from it in order to make positive change.

## Engineering Practices in the NGSS

May 13, 2006 . The Framework specifies that each performance expectation must combine a relevant practice of science or engineering, with a core disciplinary idea and crosscutting concept, appropriate for students of the designated grade level. That guideline is perhaps the most significant way in which the NGSS differs from prior standards documents.
