Muye Dobo Tongji Chôngjo (Roi de Corée ;) 2000 In 1789, King Chongjo, ruler of the Yi dynasty, ordered General Yi Duk-moo to compile an official textbook on all martial art forms then present in Korea to preserve them for future generations. The result, the Muye Dobo Tongji, is the only surviving classical text on the Korean arts of war. Based on the earliest known Korean martial arts treatise, the Muye Chebo written in 1599, the Muye Dobo Tongji clearly shows the influence of the neighbouring Japanese and Chinese armies. Through hundreds of wars and invasions, Korean soldiers adapted battlefield skills and tactics from their enemies, creating a unique system of their own. Organised into 24 distinct disciplines comprised of empty hand fighting, weaponry and horsemanship, this book is an accurate historical snapshot of the warrior arts of the hermit kingdom in the late 18th century. The release of 'The Comprehensive Illustrated Manual of Martial Arts of Ancient Korea' marks the first time this volume is available in English. Carefully translated from the original text and illustrated with reproductions of ancient woodblock carvings, this book provides fascinating insights into Korea's martial arts legacy.

Michael Wright ￼￼ *Parting the Clouds - the Science of the Martial Arts* Grenville Harrop 2011-12 This is a book that’s long overdue: One that provides information that has never before been published, compiled or analyzed in a way that’s designed to help fighters. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts.

Sonny Umpad’s Eskrima George M. Yore 2012-11-06 Sonny Umpad’s Eskrima provides insight on Maestro Santiago “Sonny” Umpad’s life, philosophy, and teaching methods, as well as the structural underpinnings of his system. Born with the soul of a warrior, the intellect of a scholar, and a zealot’s devotion to his art, Maestro Santiago “Sonny” Umpad forged an enduring contribution to the rich and colorful history of Filipino martial culture. In 1976, after immigrating to the United States, Sonny founded the school of Visayan Style Corto Kadena & Larga Mano Eskrima—rooted in his training in the Philippines and tested by a hard and dangerous life on the streets, Sonny’s system was above all else practical. As Sonny’s reputation as a talented fighter became well-known, he began to cross-train with masters of other martial arts, including Jesse Glover (Bruce Lee’s first student) and Wally Jay (founder of Small Circle Jujitsu). One of the most innovative and visionary exponents of the Filipino arts, Sonny pioneered the concept of “mixed martial arts” long before the term was in use. Instructor George Yore has assembled the writings of six of Sonny’s students (including Wade Williams, 2012 nominee for the U.S. Martial Arts Hall of Fame) to create a biographic homage to this remarkable martial artist; basic techniques and applications are also demonstrated, accompanied by 130 step-by-step photos. Practitioners of Filipino martial arts—as well as mixed martial artists and security specialists—will find valuable instruction in techniques and applications, while the thousands of people touched by Sonny’s teachings will gain a new understanding of this notoriously reclusive master’s life—and how his experiences informed the development of his system. The Jin Yong Phenomenon Ann Huss 2007 This pioneering book is the first English-language collection of academic articles on Jin Yong’s works. It introduces an important dissenting voice in Chinese literature to the English-speaking audience. Jin Yong is hailed as the most influential martial arts novelist in twentieth-century Chinese literary history. His novels are regarded by readers and critics as "the common language of Chinese around the world" because of their international circulation and various adaptations (film, television serials, comic books, video games). Not only has the public affirmed the popularity and literary value of his novels, but the academic world has finally begun to notice his achievement as well. The significance of this book lies in its interpretation of Jin Yong’s novels through the larger lens of twentieth-century Chinese literature. It considers the important theoretical issues arising from such terms as modernity, gender, nationalism, East/West conflict, and high literature versus low culture. The contributors of the articles are all eminent scholars, including famous exiled scholar, philosopher, and writer Liu Zifu.

Karate Training Robin L. Rielly 2012-02-21 This martial arts guide could actually be considered two books in one: a thorough history of Japanese karate–do and a profusely illustrated instruction manual for students of the martial art who have advanced beyond the beginning stages. Part One: Concerned about the misinterpretation of Japanese culture in general and karate in particular by many Western practitioners of karate, the author sets out in Part One of his book to trace the history of karate from its probable origins in India (or perhaps Greece) and its transmission in successively more developed forms to China, Okinawa, and then Japan. In Part Two: In this practical martial arts training manual the author first demonstrates important points of etiquette to be used in the karate dojo. He follows with well-illustrated instructions of kumite (sparring drills), including those involving two practitioners and those such as the doubleline drill and the circle drill which give practice in facing a number of opponents. Descriptions of many of these are not readily found in other English–language publications. He then presents nine kata, introductory the advanced kata, Sochin and Nijushiho.

Taekwondo Udo Moenig 2015-04-10 This book provides a comprehensive overview of the historical, political, and technical evolution of taekwondo. Many of the supposedly "traditional" and "ancient" Korean cultural elements attached to taekwondo are, in fact, remnants of East Asia’s modernization drive, and largely inherited from the Japanese martial arts. The current historical portrayal has created an obstacle to a clear understanding of the history of taekwondo, and presents problems and contradictions in philosophy and training methodology. Using rich empirical data, including interviews with leading figures in the field, this book brings together martial arts philosophy with an analysis of the technical aspects and the development of taekwondo, and provides a detailed comparison of karate and taekwondo techniques. It debunks nationalistic mythology surrounding taekwondo to provide a reinterpretation of taekwondo’s evolution.

Research of Martial Arts Shifu Jonathan Bluestein 2014-07-27 Jonathan Bluestein’s Research of Martial Arts is a book about the true essence of martial arts. It includes neither instruction on deadly killing techniques, nor mystical tales of so called super-human masters. Rather, it is a vast compilation of seriously thought-out observations made on the subject by the author, as well as many other martial artists and scientists, with a slight touch of history and humour. The goal of this project had from the start been to surpass the current standard in the martial arts literary market, and offer readers worldwide something which they have never seen before. In essence, a book in which are found countless answers for martial arts practitioners which they cannot be read elsewhere, which address commonly discussed martially-related topics with breadth and depth unparalleled in other works to this day (in any language). It holds among its pages no less than 220,000 words, containing knowledge which would be coveted by many. The aim of this book is to present the reader a coherent, clear-cut, and in-depth view of some of the most perplexing and controversial subjects in the world of martial arts, as well as providing a healthy dose of philosophical outlook on these subjects (from various individuals). At its core is the author’s aspiration to build a stronger theoretical foundation for the discussion of martial arts, while addressing matters in innovative ways, which I have come to believe, would help people to better grasp the nature of these arts. There are books by authors who will tell you that some aspects of the martial arts are too complex for concrete, coherent and defined explanations. Others have used ambiguous terminology to explain what they could not pronounce otherwise. This is no such book. This book was written to provide you with the solid, applicable answers and ideas that you could actually understand, and take away with you. This book is mainly comprised of three parts: | Part I: From the Inside Out - External and Internal Gong Fu | This is essentially mostly a very long & thorough discussion of martial arts theory and practice. Traditional and modern concepts and methods are discussed through the mediums of Physiology, Biology, Anatomy, Psychology, Philosophy (Western and Oriental alike), sports science, and the author’s personal experiences. The Internal Martial Arts of China receive a special, lengthier treatment in this part of the book. | Part II: Contemplations on Controlled Violence | This one is of a Philosophical and Psychological nature, and contains the author’s thoughts on the martial arts and their manifestation in our daily lives, with guest-articles by various martial arts teachers. | Part III: The Wisdom of Martial Spirits: Teachers, and the Things They Hold Dear | This part includes various interesting and comprehensive interviews with distinguished martial arts masters, spanning dozens of pages each. Every one of the interviewees is a person whose views and ideas are thought provoking and well-worth reading. The teachers interviewed in this book are: Master Chen Zhonghua (Chen Taiji Quan) Master Yang Hai (Xing Yi Quan, Bagua Zhang and Chen Taiji Quan) Shifu Strider Clark (Tongbei Quan, Wu style Taiji, Shuai Jiao and more) Shifu Nell Ripski (Traditional Drunken Fist and many others) Sifu James Cama (Buddha Hand Wing Chun and Southern Praying Mantis) Itzik Cohen Sensei (Shito-ryu Karate) No matter the age, rank, status or experience - this book was written for everyone who see themselves part of the martial arts community. It is my sincere hope that any person who reads this book will benefit from the time he or she had spent doing so. May this work encourage others to continue intelligent writing and research in the field, as I was pushed forth and built upon the knowledge others have shared before me. May you have a pleasant reading experience! =]
