Compact Utility Tractors Dennis David 2013-06-01 Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

Reflections Sam Lawson 2020-11-06 If you are thinking of starting your own business, wanting to grow your business, or getting into politics (on a local, state, or national platform), this book is a must for you. It is full of lessons that Sam has learned over his lifetime of experience that will help you make your own decisions as you move forward. Sam's daughter, Jean-Marie, has been involved in business and politics her entire life. She ran for and became the Democratic nominee for the Commission of Agriculture
